Subject: [Reminder] Interested in solving crimes faster? Join NEC to learn more.
Date: Monday, April 30, 2018 6:55:17 AM

Dear Candace,

Whether in the crime lab, in the field, at the crime scene or in the office, the unparalleled and unsurpassed identification matching accuracy and speed of NEC's Advanced Recognition Systems fingerprint and facial recognition solutions provide the technology-based partnership required for accurate real-time and post-event investigations.

If you'll be attending the Western States Joint Conference, stop by to see us in **Booth #101** where we'll be **showcasing our newest multi-modal biometric workstation**, and to learn how our solutions can help you and your agency by:

- Enabling forensic examiners and investigators to identify more offenders faster, for more efficient and effective crime solving
- Utilizing NEC's award winning algorithms to accurately identify more people and solve more crimes
- Protecting your investment with continuous commitment to R&D and engineering of best-in-class solutions and products for law enforcement agencies to meet their mission goals

Also, we invite you to join John Dowden's session **Biometrics and Video Analytics to Improve Public Safety** on Wednesday, May 2 at 4:00pm. As part of this workshop, John will explain and demonstrate the latest biometric and video analytic technologies that can be utilized to render advanced recognition systems.

We look forward to connecting with you at the conference!

To learn more about how other agencies are leveraging our facial recognition solutions to solve cases and produce leads, watch this short video.

Best regards,
The NEC Advanced Recognition Systems Team
